

The SIMA Journey

Why is it time for
Lao PDR to join
the SIMA Journey?

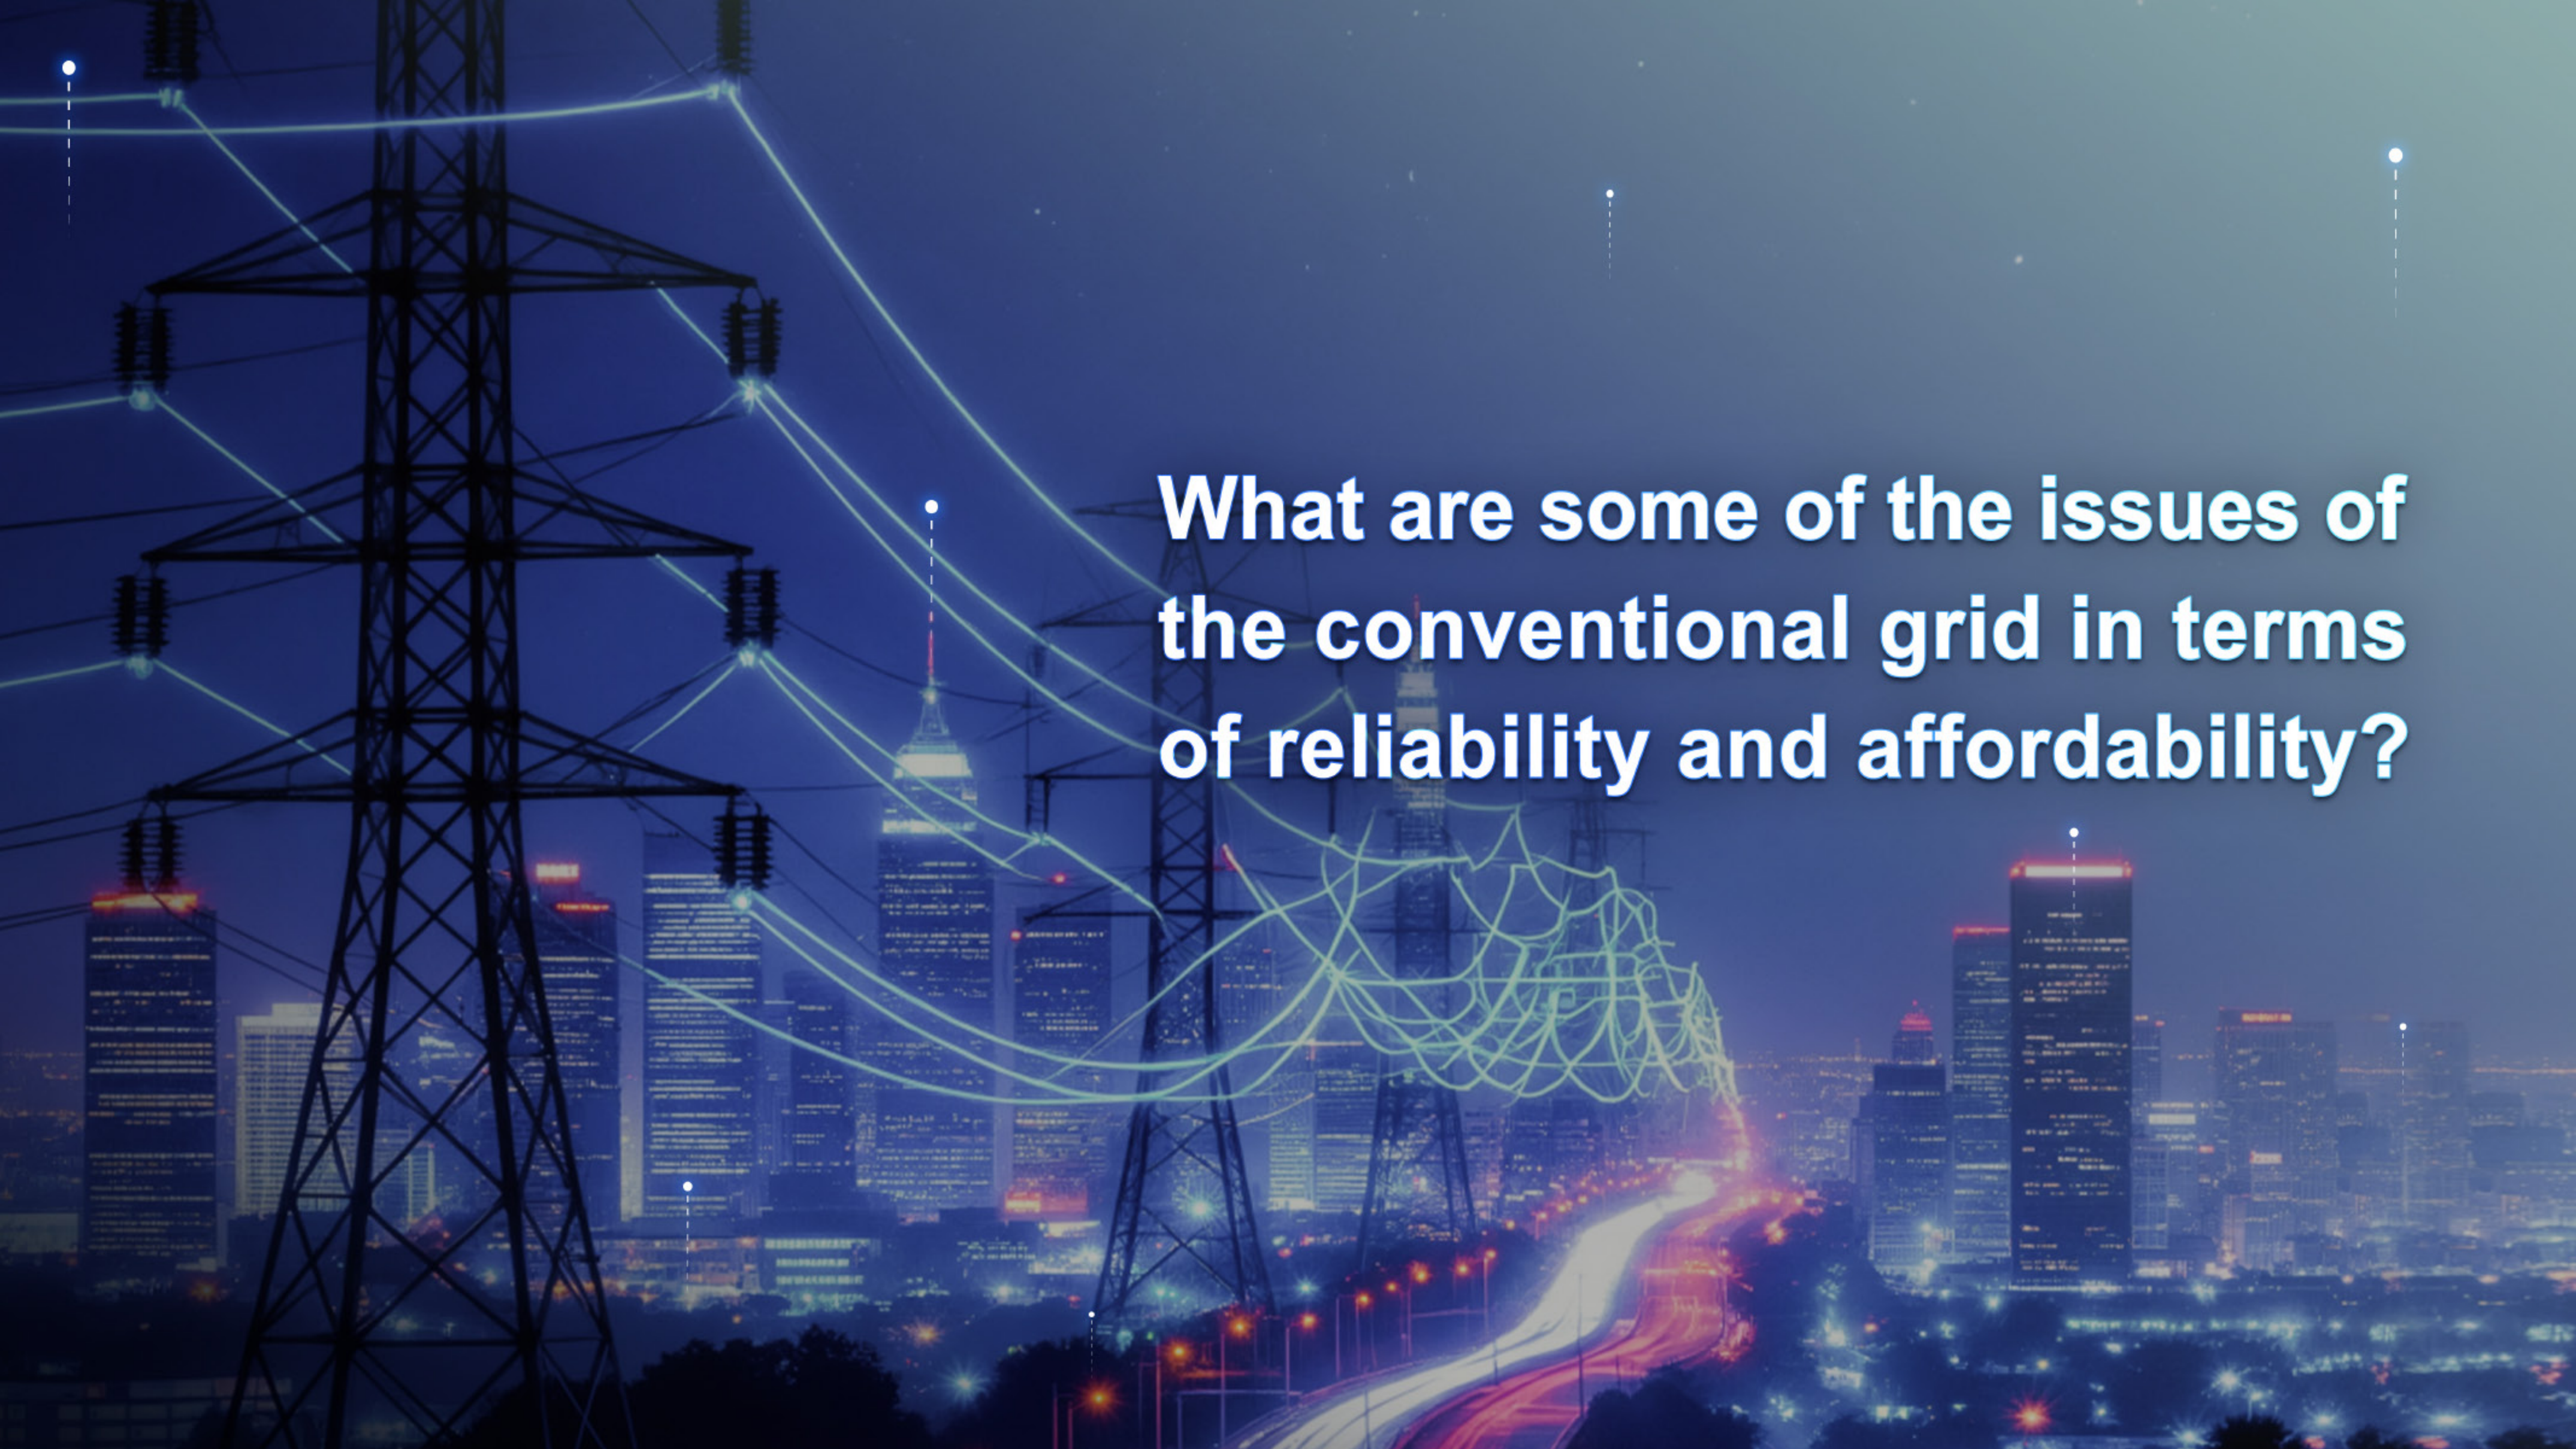

Phally,
CEO and Founder of VP.Start

Why is the *data-driven SIMA Smart Grid*
a good fit for the EDL in terms of costs
and outcomes?

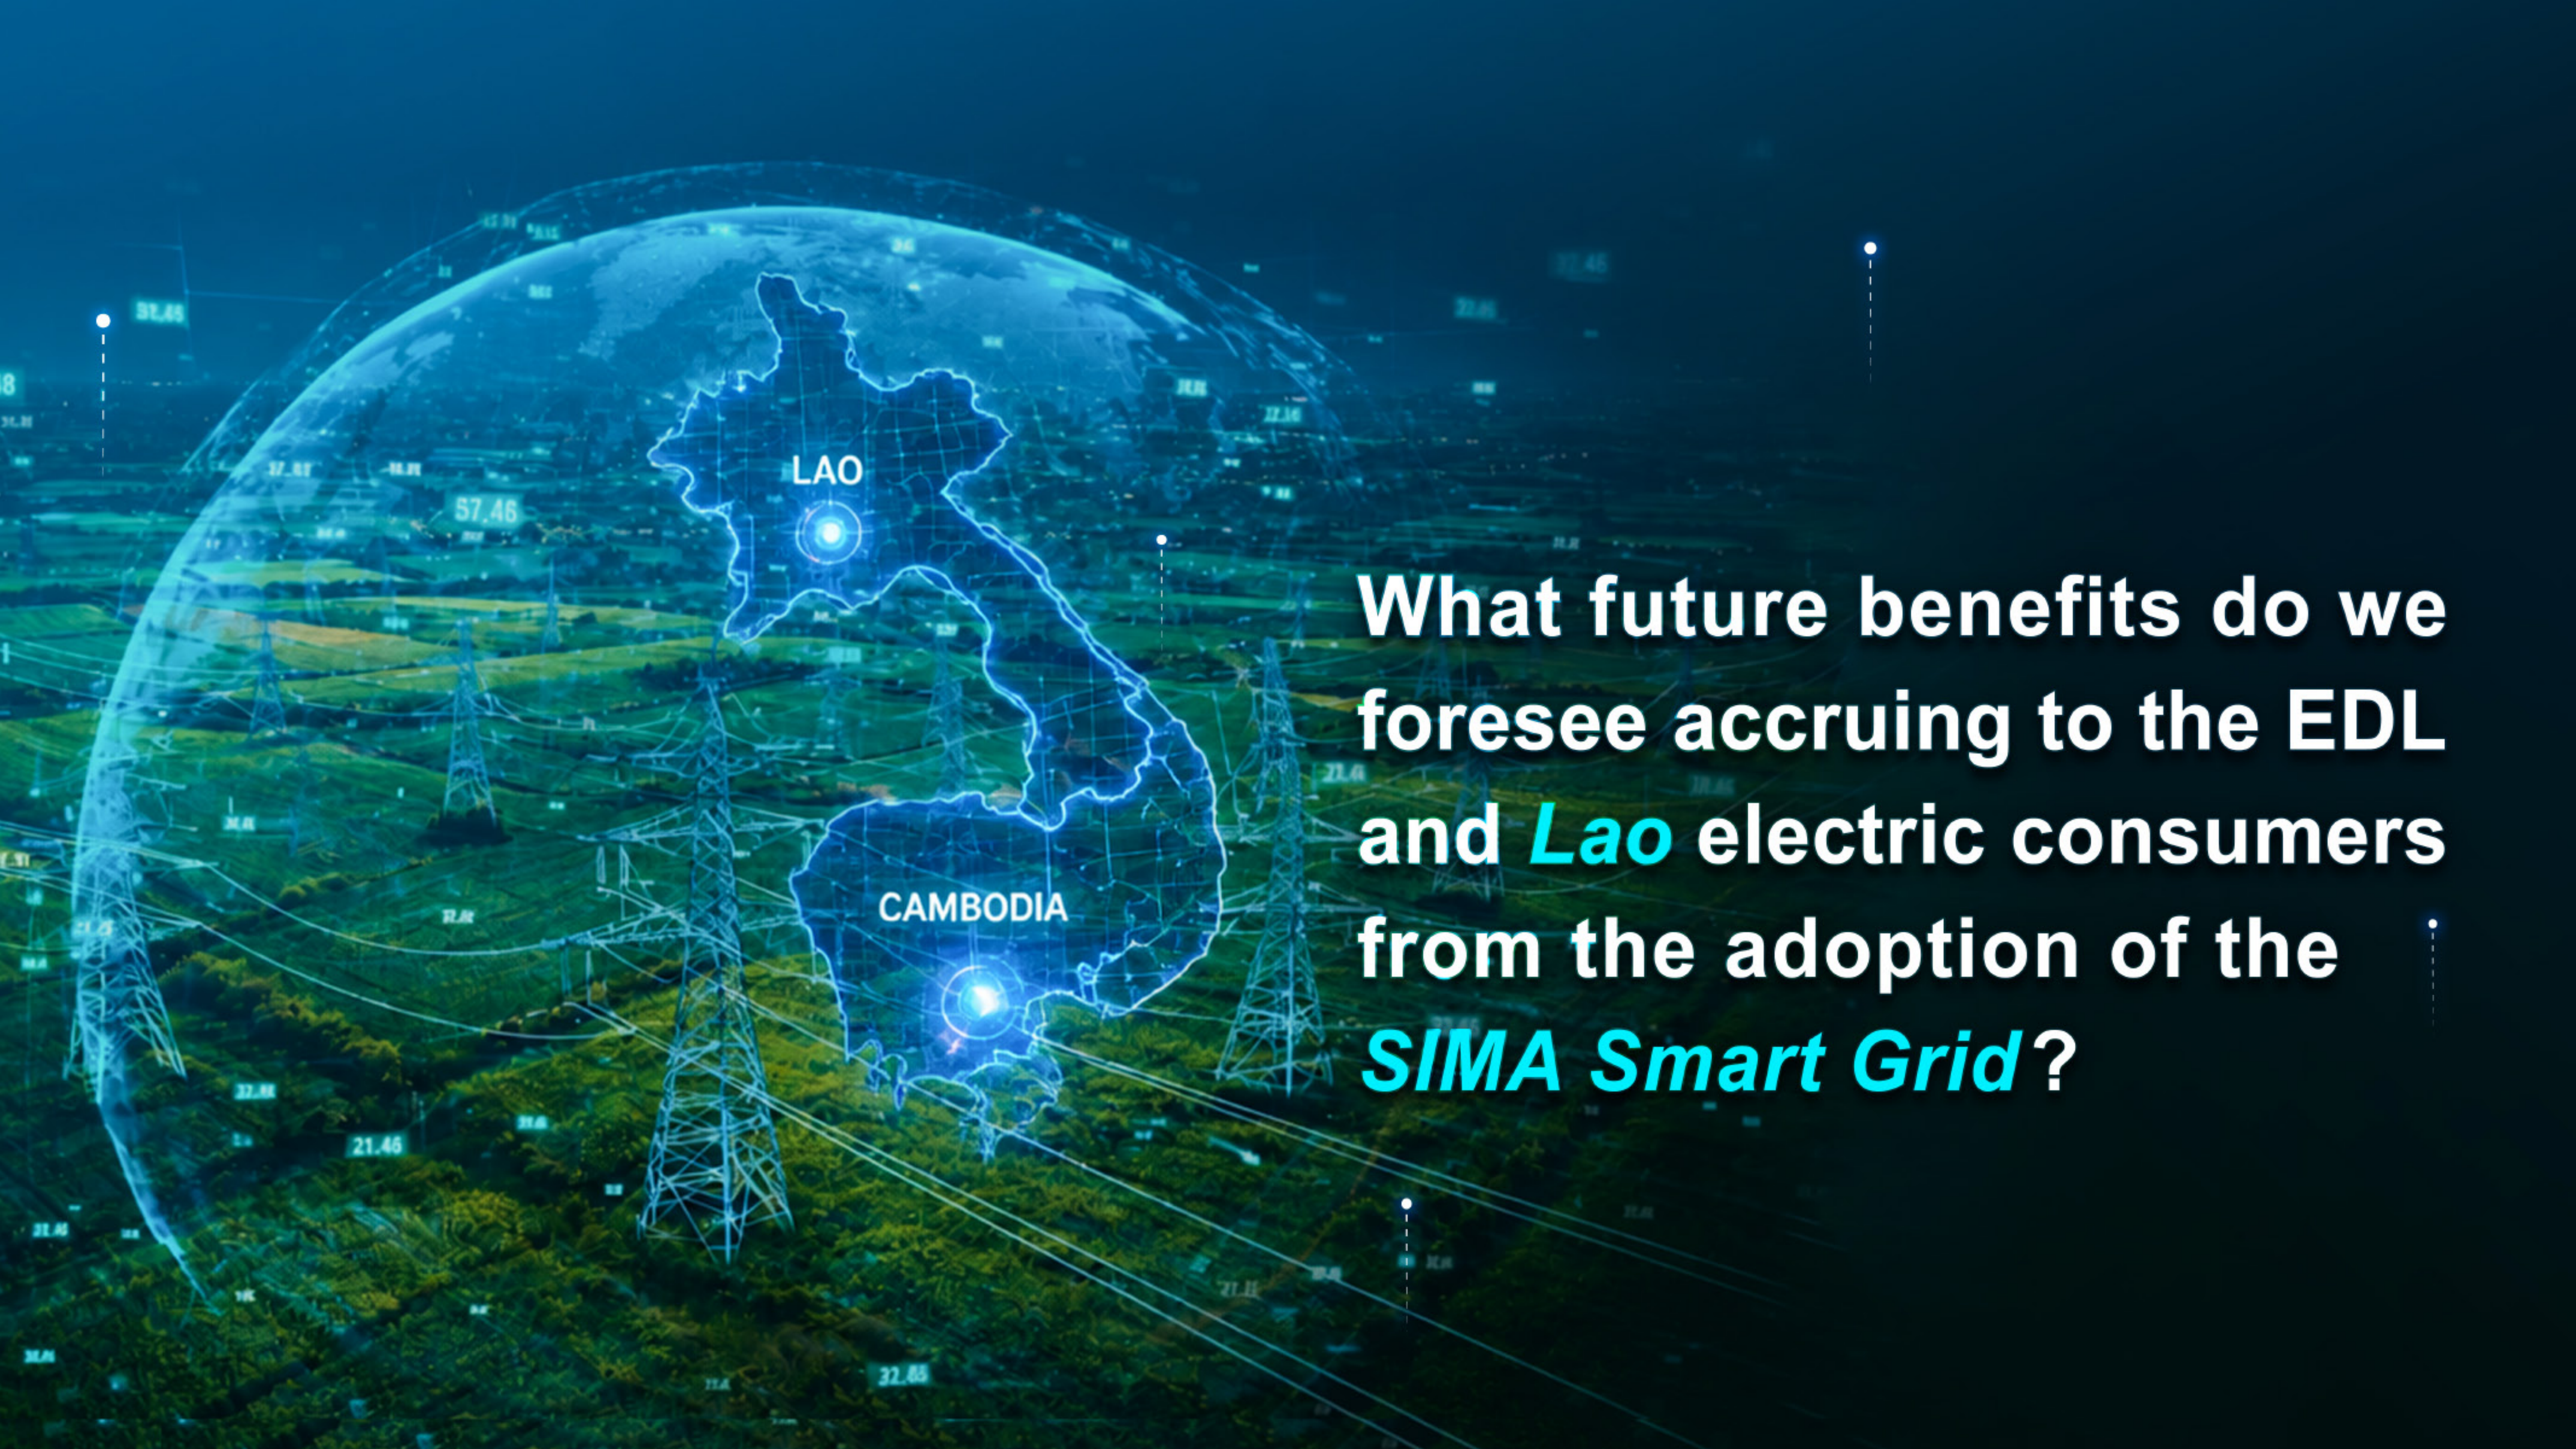

What are some of the issues of the conventional grid in terms of reliability and affordability?

Why are the **DRC** series, the **PLUM** app and other solutions of VP.Start a beneficial way to achieve better **SAIFI** and **SAIDI** outcomes while decreasing energy costs in Laos?

As we know, **Lao PDR** has abundant hydroelectric resources. How can the **SIMA Smart Grid** facilitate effective hydroelectricity integration while navigating seasonal intermittency?

What future benefits do we foresee accruing to the EDL and **Lao** electric consumers from the adoption of the **SIMA Smart Grid**?
